

(Following Paper ID and Roll No. to be filled in your Answer Book)

Paper ID : 110302

Roll No.

**B.Tech.**

**(SEM. III) THEORY EXAMINATION. 2015-16**

**DISCRETE STRUCTURES AND GRAPH THEORY**

**[Time : 3 hours]**

**[Total Marks : 100]**

**Section-A**

1. Attempt **all** parts. All parts carry **equal** marks. Write answers of each section in short. (10x2=20)
  - (a) Define multiset and power set. Determine the power set  $A = \{1, 2\}$ .
  - (b) Show that  $(((pq) \Rightarrow r) (\sim p)) \Rightarrow (q=r)$  is tautology or contradiction.
  - (c) State and prove pigeon hole principle.
  - (d) Show that if set A has 3 elements, then we can have 26 symmetric relation on A.
  - (e) Prove that  $(P \vee Q) \rightarrow (P \wedge Q)$  is logically equivalent to  $P \leftrightarrow Q$ .

- (f) How many 4 digit numbers can be formed by using the digits 2, 4, 6, 8 when repetition of digits is allowed.
- (g) The converse of a statements is: If a steel rod is stretched, then it has been heated. Write the inverse of the statement.
- (h) If a and b are any two elements of group G then prove  $(ab)^{-1}=(b^{-1}a^{-1})$ .
- (i) If  $f: A \rightarrow B$  is one-one onto mapping, then prove that  $f^{-1}: B \rightarrow A$  will be one-one onto mapping.
- (j) Write the following in DNF  $(x+y)(x'+y')$ .

### Section-B

Attempt **any five** questions.

(10×5=50)

2. If  $D_n$  define the set of all positive odd integers, i.e.  $D_n=\{1,3, 5,\dots,\dots\}$ , then prove with the help of mathematical induction  $P(n) : 1+3n$  is divisible by 4.
3. Solve the recurrence relation using generating function:  
 $a_n - 7a_{n-1} + 10a_{n-2} = 0$  with  $a_0=3, a_1=3$ .

4. Express the following statements using quantifiers and logical connectives.
- Mathematics book that is published in India has a blue cover.
  - All animals are mortal. All human being are animal. Therefore, all human being are mortal.
  - There exists a mathematics book with a cover that is not blue.
  - He eats crackers only if he drinks milk.
  - There are mathematics books that are published outside India.
  - Not all books have bibliographies.
5. Draw the Haase digram of  $[p(a, b, c), \leq]$ , (Note: ' $\leq$ ' stands for subset). Find greatest element, least element, minimal element and maximal element.
6. Simplify the following boolean expressions using k map:
- $Y = ((AB)' + A' + AB)'$
  - $A'B'C'D' + A'B'C'D + A'B'CD + A'B'B'CD' = A'B'$

7. Let  $G$  be the set of all non-zero real number and let  $a*b=ab/2$ . Show that  $(G,*)$  be an abelian group.
8. The following relation on  $A=\{1, 2, 3, 4\}$ . Determine whether the following :
- a)  $R = \{(1,3), (3,1), (1,1), (1,2), (3,3), (4,4)\}$ ,
- b)  $R=AXA$
9. If the permutation of the elements of  $\{1,2,3,4,5\}$  are given by  $a=(1\ 2\ 3)(4\ 5)$ ,  $b=(1)(2)(3)(4\ 5)$ ,  $c=(1\ 5\ 2\ 4)(3)$ . Find the value of  $x$ , if  $ax=b$ . And also prove that the set  $Z_4 = \{0,1,2,3\}$  is a commutative ring with respect to the binary modulo operation  $+_4$  and  $*_4$ .

### Section-C

Attempt any two questions.

(2×15=30)

10. Let  $L$  be a bounded distributive lattice, prove if a complement exists, it is unique. Is  $D_{12}$  a complemented lattice? Draw the Hasse diagram of  $[P(a,b,c), \leq]$ , (Note: ' $\leq$ ' stands for subset). Find greatest element, least element, minimal element and maximal element.

11. Determine whether each of these functions is a bijection from  $\mathbb{R}$  to  $\mathbb{R}$ .
- (a)  $f(x) = x^2 + 1$
  - (b)  $f(x) = x^3$
  - (c)  $f(x) = (x^2 + 1)/(x^2 + 2)$
12. a) Prove that inverse of each element in a group is unique.
- b) Show that  $G = \langle (1, 2, 4, 5, 7, 8), X^9 \rangle$  is cyclic. How many generators are there? What are they?

—x—
