B. Tech.

(SEM. III) (ODD SEM.)

THEORY EXAMINATION, 2014-15

MICROBIOLOGY & CELL BIOLOGY

Time : 3 Hours]

[Total Marks : 100

Note : Attempt all questions. All questions carry equal marks.**1** Attempt any four parts of the following **(5x4=20)**

- Explain briefly the structure and functions of bacterial cell wall.
- Write a commonly used method for isolation of pure culture of bacterium.
- Write the contributions of Pasteur and Beijerinck.
- Write the special staining techniques for microscopic identification of Microorganisms.
- Explain the biochemical methods for measurement of microbial growth.

2 Attempt any four parts of the following: **(4x5=20)**

- Discuss the anaerobic digestion process of waste water treatment.
- Draw the Bacterial growth curve and explain.
- Describe the general characters of bacteria.
- Explain microbial growth kinetics.
- Explain Lyophilization and Sterilization.

3 Attempt any **two** of the followings : **(2x10=20)**

- (a) Discuss the anoxygenic photosynthesis in bacteria.
- (b) What are Biofertilizers? Discuss the various types biofertilizers used in agriculture fields.
- (c) What is Biological Nitrogen Fixation? Write the names of microorganism involved in N₂ fixation.

4 Attempt any **two** of the followings : **(2x10=20)**

- (a) Write the industrial applications of microorganism.
- (b) What are Bioremediation? Explain the various groups of microbes involve in bioremediation. Also discuss the merit and demerit of bioremediations.
- (c) What are causal organisms? Write the name and applications of causal organisms of Typhoid, Tuberculosis, Ameobiasis, Diarrhoea and Rabies.

5 Attempt any two parts of the following **(2x10=20)**

- (a) What is protein targeting? Discuss about the signal hypothesis.
- (b) Describe the process of aging. Comment on the different theories of aging.
- (c) Give a detailed account of the different stages involved in the cell cycle.
