2 Equity shares of XYZ Ltd. are currently traded at Rs. 22.50 per share. The growth rate is expected at $12 \%$ and dividend at the end of the current year at Rs. 2.50. Find out the expected rate of return. What is the expected return if it is purchased at Rs. 25 per share? If and investor requires a return of $18 \%$, what maximum price he should be ready to pay for the share?

## OR

Explain various types of charts used by technical andiyst to predict future behaviour of prices and the relevance of fundamental analysis and technical analysis for an individual investor.

An investor finds the following position in respect 20 of two bonds I and II :

|  | Face <br> value | Coupon <br> rate | Life | Market <br> price |
| :---: | :---: | :---: | :---: | :---: |
| Bond I | Rs. 5,000 | $8,50 \%$ | 3 years | Rs. 9,900 |
| Bond II | Rs. 10,000 | $8,75 \%$ | 4 years | Rs 4,950 |

Given that coupon interest is payable amualy and the required rate is $9 \%$. Find out the value of both bonds. Which one is better to invest in ?

## OR

(i) American option and European option
(ii) Futures and options
(iii) Option in the money and option out of money

The returns of two assets under four $10+5+5=20$ possible states of nature are given below

| State of <br> nature | Probability | Return on <br> asset 1 | Return on <br> asset 2 |
| :---: | :---: | :---: | :---: |
| 1 | 0.2 | $-5 \%$ | $10 \%$ |
| 2 | 0.3 | $15 \%$ | $12 \%$ |
| 3 | 0.4 | $18 \%$ | $14 \%$ |
| 4 | 0.1 | $22 \%$ | $18 \%$ |

(1) What is the standard deviation of the retum on asset 1 and on asset 2 ?
(2) What is the covariance between the returns on asset 1 and asset 2 ?
