Outcomes (PSO)

Institute Vision and Mission

Vision

Our vision is to impart Vibrant, Innovative and Global Education to make IMS the world leader in terms of Excellence of Education, Research and to serve the nation in the 21st century.

Mission

- To develop IMSEC as a Centre of Excellence in Technical and Management Education.
- To inculcate in its students the qualities of Leadership, Professionalism, Executive Competence and Corporate understanding.
- To imbibe and enhance Human Values, Ethics and Morals in our students.
- To transform students into Globally Competitive Professionals

Department Vision and Mission

Vision

To be recognized as a Centre of Excellence imparting quality education and creating new opportunities for students to meet the challenges of technological development in Computer Science & Engineering.

Mission

- To promote technical proficiency by adopting effective teaching learning processes.
- To provide environment & opportunity for students to bring out their inherent talents for all round development.
- To promote latest technologies in Computer Science & Engineering and across disciplines in order to serve the needs of Industry, Government, Society, and the scientific community.
- To educate students to be Successful, Ethical and Effective problem-solvers and Life-Long learners who will contribute positively to the society.

Program Outcomes

Engineering Graduates will be able to:

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. Individual and teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. Life-long learning: Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Educational Objectives

1. Graduates of the program will be able to apply fundamental principles of engineering in problem solving and understand the role of computing in multiple disciplines.
2. Graduates will learn to apply various computational techniques & tools for developing solutions & projects in real world.
3. Be employed as computer science professionals beyond entry-level positions or be making satisfactory progress in graduate programs.
4. Demonstrate that they can function, communicate, collaborate and continue to learn effectively as ethically and socially responsible computer science professionals.

Program Specific Outcomes (PSO)

1. Foundation of Computer System: Ability to understand the principles and working of computer systems.
2. Foundations of Software development: Possess professional skills and knowledge of software design process. Familiarity and practical competence with a broad range of programming language and open-source platforms.
3. Foundation of mathematical concepts: Ability to apply mathematical methodologies to solve computation task, model real world problem using appropriate data structure and suitable algorithm.
4. Applications of Computing and Research Ability: Ability to use knowledge in various domains to identify research gaps and hence to provide solution to new ideas and innovations.

IMS Engineering College, Ghaziabad

B.TECH (COMPUTER SCIENCE AND ENGINEERING)

SEMESTER- III

| Sl. No. | Subject Codes | Subject | Periods | | | Evaluation Scheme | | | | End Semester | | Total | Credit |
|---|----------------------|--|---------|---|---|-------------------|----|-------|----|--------------|----|------------|-----------|

| Sub Code | KAS-302 |
| Sub. Name | MATHS-IV |

| COURSE OUTCOMES | | Bloom's Level |
|------------------------|---|----------------------|
| CO1 | The students will be able to learn the idea of partial differentiation and types of partial differential equations | K1 & K3 |
| CO2 | The students will be able to learn the idea of classification of second partial differential equations, wave, heat equation and transmission lines | K4 & K5 |
| CO3 | The students will be able to learn the basic ideas of statistics including measures of central tendency, correlation, regression and their properties. | K2 |
| CO4 | The students will be able to learn the ideas of probability and random variables and various discrete and continuous probability distributions and their properties. | K1 & K5 |
| CO5 | The students will be able to learn the statistical methods of studying data samples, hypothesis testing and statistical quality control, control charts and their properties. | K3 & K6 |

|------------------|-------------------------------------|
| Sub Code | KOE044 |
| Sub. Name | Sensor & Instrumentation |

| COURSE OUTCOMES | | Bloom's Knowledge Level |
|------------------------|---|--------------------------------|
| CO1 | Student will be able to apply the use of sensors for measurement of displacement, force and pressure. | K3 |
| CO2 | Student will be able to employ commonly used sensors in industry for measurement of temperature, position, accelerometer, vibration sensor, flow and level. | K2 |
| CO3 | Student will be able to demonstrate the use of virtual instrumentation in automation industries. | K3 |
| CO4 | Student will be able to identify and use data acquisition methods. | K1 |
| CO5 | Student will be able to comprehend intelligent instrumentation in industrial automation. | K2 |

| 11 | | MOOCs (Essential for Hons. Degree) | | | | | | | | | | | |
| | | Total | 17 | 3 | 8 | | | | | | | 950 | 22 |

*The Mini Project or internship (4 weeks) conducted during summer break after IV semester and will be assessed during V semester.

Departmental Elective-I

1. KCS-051 Data Analytics
2. KCS-052 Web Designing
3. KCS-053 Computer Graphics
4. KCS-054 Object Oriented System Design

Departmental Elective-II

1. KCS-055 Machine Learning Techniques
2. KCS-056 Application of Soft Computing
3. KCS-057 Augmented & Virtual Reality
4. KCS-058 Human Computer Interface

IMS Engineering College, Ghaziabad

| | |
|------------------|-----------------------------------|
| Sub Code | KCS-501 |
| Sub. Name | Database Management System |

| COURSE OUTCOMES | | Bloom's Level |
|------------------------|---|----------------------|
| CO1 | Apply knowledge of database for real life applications. | K3 |
| CO2 | Apply query processing techniques to automate the real time problems of databases. | K3, K4 |
| CO3 | Identify and solve the redundancy problem in database tables using normalization. | K2, K3 |
| CO4 | Understand the concepts of transactions, their processing so they will familiar with broad range of database management issues including data integrity, security and recovery. | K2, K4 |
| CO5 | Design, develop and implement a small database project using database tools. | K3, K6 |

| | |
|------------------|------------------------|
| Sub Code | KCS-502 |
| Sub. Name | Compiler Design |

| COURSE OUTCOMES | | Bloom's Level |
|------------------------|--|----------------------|
| CO1 | Acquire knowledge of different phases and passes of the compiler and also able to use the compiler tools like LEX, YACC, etc. Students will also be able to design different types of compiler tools to meet the requirements of the realistic constraints of compilers. | K3, K6 |
| CO2 | Understand the parser and its types i.e. Top-Down and Bottom-up parsers and construction of LL, SLR, CLR, and LALR parsing table | K2, K6 |
| CO3 | Implement the compiler using syntax-directed translation method and get knowledge about the synthesized and inherited attributes. | K4, K5 |
| CO4 | Acquire knowledge about run time data structure like symbol table organization and different techniques used in that. | K2, K3 |
| CO5 | Understand the target machine's run time environment, its instruction set for code generation and techniques used for code optimization. | K2, K4 |

| | |
|------------------|--------------------------|
| Sub Code | KCS603 |
| Sub. Name | Computer Networks |

| COURSE OUTCOMES | | Bloom's Level |
|------------------------|---|----------------------|
| CO1 | Explain basic concepts, OSI reference model, services and role of each layer of OSI model and TCP/IP, networks devices and transmission media, Analog and digital data transmission | K1, K2 |
| CO2 | Apply channel allocation, framing, error and flow control techniques. | K3 |
| CO3 | Describe the functions of Network Layer i.e. Logical addressing, subnetting & Routing Mechanism. | K2, K3 |
| CO4 | Explain the different Transport Layer function i.e. Port addressing, Connection Management, Error control and Flow control mechanism | K2, K3 |
| CO5 | Explain the functions offered by session and presentation layer and their Implementation | K2, K3 |
| CO6 | Explain the different protocols used at application layer i.e. HTTP, SNMP, SMTP, FTP, TELNET and VPN. | K2 |

IMS Engineering College, Ghaziabad

| | |
|------------------|----------------------------|
| Sub Code | RCS-701 |
| Sub. Name | Distributed Systems |

| COURSE OUTCOMES | | Bloom's Level |
|------------------------|---|----------------------|
| CO1 | Students will be able to define the principles and architectural models of Distributed Systems in order to determine the global system state and identify the clock models used in distributed systems. | K1 |
| CO2 | Students will be able to identify the requirements of Mutual Exclusion and describe various deadlock detection strategies. | K1 |
| CO3 | Students will be able to illustrate the System models of Agreement Problems and application of these agreement protocols in real life problems like Atomic commit in DDBS. | K3 |
| CO4 | Students will be able to classify the failure recovery (forward/backward) in concurrent systems and formulating algorithms for achieving fault tolerance in distributed systems. | K4 |
| CO5 | Students will be able to compare various methods used for attaining concurrency control in distributed transactions and resolving the distributed deadlocks in transactions. | K2 |

IMS Engineering College, Ghaziabad

| | |
|------------------|----------------|
| Sub Code | RCS 852 |
| Sub. Name | Project |

| COURSE OUTCOMES | | Bloom's Level |
|------------------------|--|----------------------|
| CO1 | The students can effectively collaborate in groups to achieve a common goal. | K2 |
| CO2 | Students can improve their capacity to communicate effectively with a diverse group of people. | K3, K5 |
| CO3 | Students learn how to design a software or hardware product by learning technical skills, conducting research, and responding ethically. | K1, K3, K4 |
| CO4 | The students use what they've learned to create and implement a business plan for an entrepreneurial venture. | K3, K6 |
| CO5 | Students build self-learning skills and apply them to lifelong learning. | K3, K6 |
